

Glue/paste dispenser WP-1900

Glue/paste dispenser WP-1900

- Full dispensing control of many parameters (quantity, time, cycle, etc.)
- Suitable for many types of liquids and pastes: glues, silicones, resins
- Electromagnetic valve assures steady flow
- Foot pedal

Application

- Dispensing of:
 - solder pastes and glues
 - lacquers
 - greases
 - oils
 - resins
 - silicones
 - rubber
 - and other liquids

Advantages

- Precise and repeatable dispensing of required quantities
- Reduced costs and shorter work process
- Helps to perform according to technological requirements of production process
- Very quiet
- Portable and durable
- Liquid leakage elimination feature

Technical data

- Input voltage: 24 VDC, 0,7 A
- Feeding time control - programmable:
 - 0,01-1 s.
 - 0,1-10 s.
 - 0,2-20 s.
 - 0,3-20 s.
- Feeding repeatability: +/- 5%
- Minimum fed quantity of paste/glue: 0,01 ml
- Input air pressure: 35 psi min, 100 psi max.
- Output air pressure: 1 psi min, 100 psi max.
- Dimensions: 238 x 150 x 60 mm)
- Weight: 1,7 kg
